

# UROLOGY & ANDROLOGY PRECEPTORSHIP PROGRAM

**27-28 September 2024**

**Prof. Dr. Cemil Taşcıoğlu Şehir Hastanesi**

**Thursday- Arrivals  
Course Day 1 Friday  
URINARY INCONTINENCE**

The objective of this course is to provide urologists with the knowledge and skills needed to effectively diagnose and manage urinary incontinence in men and women. Through a combination of didactic lectures, case discussions, and live surgeries, participants will gain an understanding of the epidemiology, pathophysiology, and diagnosis of urinary incontinence. They will also learn about the various conservative and medical management options available, including behavioral therapy, pharmacotherapy, and surgical interventions such as sling procedures, trans obturator tape, and artificial urinary sphincters. The live surgeries will provide an opportunity for participants to observe the surgical techniques for trans obturator tape for stress urinary incontinence in women and artificial urinary sphincter for post-prostatectomy incontinence in men. By the end of the course, urologists will be able to develop an individualized treatment plan for their patients with urinary incontinence and will be equipped to make informed decisions regarding the most appropriate treatment option based on the patient's needs and preferences.

- 09:00-09:20 AM Stress Incontinence in Men and Women: Epidemiology, Etiology**  
*Ahmet Tahra*
- 09:20-09:40 AM Pathophysiology and Risk Factors to Incontinence**  
*Murat Dinçer*
- 09:40-10:00 AM Assessment and Diagnosis of Incontinence**  
*Murat Dinçer*
- 10:00-10:20 AM Coffee Break**
- 10:20-10:40 AM Conservative and Medical Management of SUI**  
*M. Gökhan Çulha*
- 10:40-11:00 AM Surgical Management of SUI in Women**  
*M. Gökhan Çulha*
- 11:00-11:20 AM Surgical Management of PPI in Men**  
*Murat Dinçer*
- 11:20-12:00 PM Case Discussions**
- 12:00-13:00 PM Lunch**
- 13:00-14:00 PM Live Surgery of AUS for Post-Prostatectomy Incontinence**  
*Ahmet Tahra Murat Dinçer*
- 14:00-15:00 PM Live Surgery of TOT for Stress Urinary Incontinence**  
*Murat Dinçer, M. Gökhan Çulha*
- 15:00-15:20 PM Conclusion and Discussion**

## **Day 2 Saturday**

- 09:00-09:20 AM Anatomy and Physiology of Erectile Function**  
*Metin Öztürk*
- 09:20-09:40 AM Etiology and Risk Factors for Erectile Dysfunction**  
*Caner Baran*
- 09:40-10:00 AM Evaluation of the patient with erectile dysfunction**  
*Tuncay Taş*
- 10:00-10:20 AM Discussion**
- 10:20-10:40 AM Coffee break**
- 10:40-11:00 AM PDE5 inhibitors: pharmacological effects for ED**  
*Mustafa Kadıhasanoğlu*
- 11:00-11:20 AM Intracavernosal therapy for ED**  
*Murat Dursun*
- 11:40-12:00 PM Regenerative Medicine for ED and Peyronie's Disease**  
*Samet Şenel*
- 12:00-13:00 PM Lunch**
- 13:20-13:40 PM Implantation of Penile Prosthesis with infrapubic technique**  
*Lütfi Canat*
- 13:40-14:00 PM Implantation of Penile Prosthesis with penoscrotal technique**  
*Ateş Kadioğlu*
- 15:00-15:20 PM Peyronie's disease surgery: an update**  
*Ateş Kadioğlu*

**Social Program**
