Subject: Andrology Online Session - "Pearls of Wisdom"

Dear GAF Members,

We will start our **2026 academic activities** with a bang, featuring a not-to-be-missed **"Pearls of Wisdom"** session as part of our **GAF Andrology Online program**.

The speaker for this session is our senior colleague, **Giovanni Colpi**, who will share a lifetime of unparalleled experience in non-obstructive azoospermia and surgical sperm retrieval. For any surgical andrologist involved in the management of NOA, this session is not merely recommended. It is essential.

This is a rare opportunity to learn directly from a true master surgeon whose career has been devoted with unwavering passion and precision to advancing the science and art of sperm retrieval in the most challenging clinical scenarios.

Professor Colpi's extraordinary contributions over more than five decades have shaped contemporary andrology and influenced generations of clinicians worldwide. His remarkable life's work has recently been honored in a dedicated editorial on **"Andrology Legends,"** which recognizes individuals whose impact transcends publications and procedures to define an entire field. This editorial is shared in the digital workspace for your reference (Urology Research and Practice 2025;51(5):164-172).

Attending this session is not just about acquiring surgical insights. It is about witnessing the legacy of a pioneer and absorbing wisdom forged through decades of dedication, innovation, and clinical excellence.

Please see the details below and mark your calendar.
